Licensing Terms

- Licensees agree to the terms specified in the Tokutek Software License Agreement.
- Capacity is defined as the sum of all uncompressed user data found in TokuDB tables on:
 - all MySQL server instances
 - all replication slaves
 - excluding indexes
 - as reported by a script provided by Tokutek
- Development licenses may be used for application development, demonstrations, qualification and testing, teaching, and research and experimentation.
- Technical support is for TokuDB only, not for MySQL.

FAQ - Frequently Asked Questions

1. How do I determine what license capacity is needed?

License capacity is determined by the maximum amount of uncompressed user data, excluding indexes, in all TokuDB tables in all mysqld instances. Tokutek provides a script that reports the amount of user data in all TokuDB tables in a single mysqld instance.

2. What can I do with a development license?

Development licenses can be used only for application development, demonstrations, qualification and testing, teaching, and research and experimentation.

3. What happens if I exceed my licensed capacity?

If you exceed your licensed capacity you can choose either to a) remove data to get back under your current licensed capacity, or b) pay the appropriate license fee based on your actual usage.

4. Will TokuDB stop working if I exceed my licensed capacity?

No. TokuDB has no license key mechanisms of any kind, nor any remote notification mechanism for reporting data usage.

5. Is a trial or evaluation license available?

Customers can use a combination of development licenses and Basic licenses free of charge to perform trials and evaluations.

6. Are upgrades available?

Upgrades are included at no additional cost. Check Tokutek's website periodically for upgraded versions. Please contact us if you have any questions.

7. Can I buy TokuDB subscriptions for multiple years?

Discounts for multi-year subscriptions for TokuDB are available. Please contact Tokutek sales for pricing information.

8. Are perpetual licenses available?

Yes. Please contact Tokutek sales for pricing.

9. Is TokuDB available on a pre-configured Amazon Machine Instance (AMI)?

We are currently evaluating offering TokuDB on AMIs. Please contact Tokutek sales for more information.
